CONFERENCE INFORMATION

Date and place

The HPC Users' Conference – KU KDM 2026 will be held on April 13-15, 2026, in Zakopane, at the Bachleda Kasprowy Hotel.

Purpose and mission

The main goal of the conference is to showcase the diversity and innovation of research conducted using the supercomputing infrastructure of the ACC Cyfronet AGH. The conference features lectures by invited guests and sponsors, plenary and poster sessions, meetings with IT hardware and software suppliers, and discussions on the effective use of Cyfronet's IT resources.

Target audience

The conference is primarily aimed at current and potential users of the Cyfronet infrastructure, representing both the scientific community and the business and public administration sectors. Additionally, the target group also includes HPC specialists and enthusiasts of modern technologies. This year, we expect over 150 participants.

Conference topics

The topics of the KU KDM focus on large-scale computations and simulations, new algorithms in computer science, tools and techniques in high-performance computing systems, as well as artificial intelligence methods and the analysis of large data sets. This year's edition, like the previous one, offers participants expanded opportunities to improve the use of supercomputers in scientific research during group training and individual consultations with the PLGrid support team.

You are cordially invited to participate in this interdisciplinary event connecting the scientific and technological communities.

SPONSORSHIP PACKAGES

Platinum package

PLN 25 000

PACKAGE IS NOT AVAILABLE
